

# Instructions to run the project

first of all youll see this folder on desktop

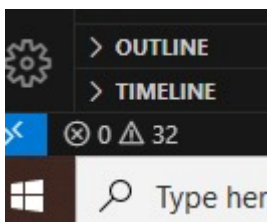

Right click on the folder

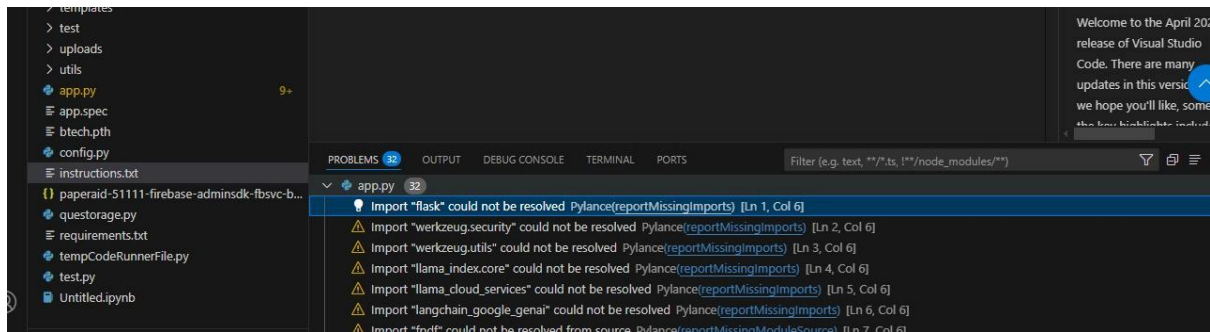

Press open with code

once the window opens

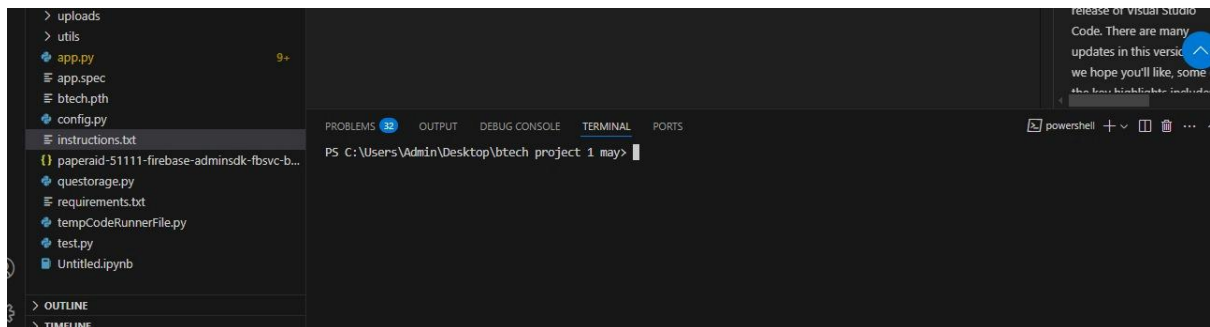

click on this cross and exclamation sign to open terminal

panel like this would appear

here click on terminal to switch to terminal

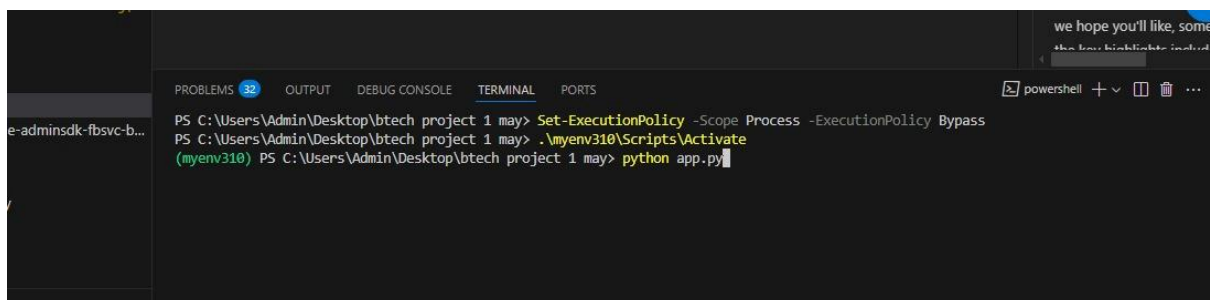

here step by step we have to paste three things

Set-ExecutionPolicy -Scope Process -ExecutionPolicy Bypass

.\myenv310\Scripts\Activate

python app.py

press enter after pasting each line

after this line wait

```
PROBLEMS 32 OUTPUT DEBUG CONSOLE TERMINAL PORTS
PS C:\Users\Admin\Desktop\btech project 1 may> Set-ExecutionPolicy -Scope Process -ExecutionPolicy RemoteSigned
PS C:\Users\Admin\Desktop\btech project 1 may> .\myenv310\Scripts\Activate
(myenv310) PS C:\Users\Admin\Desktop\btech project 1 may> python app.py
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production grade web server.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with stat
```

let this appear, and you'll be redirected to the browser
